

## **Our professionalsI nostri professionistiNos professionnelsNuestros profesionales**

A product of excellence cannot exist without men of excellence to make it so.

These men of excellence are our professionals: a technical design team and installation crew which are unique in the industry, to provide all of our customers with the best aesthetics and the most reliable installation for their PRIVAGLASS products.

SPECTRADOME is probably one of the very few companies in the world (and certainly the only one in Italy) to offer fully customized LCD glass system solutions acting as a unique supplier to the final customer for consulting and feasibility study, product supply, delivery and installation.[flagallery gid=8 skin=minima\_jn align=right]
